

Water Policy

Steel Formed Sections Ltd design and manufacture Steel Framing Systems, and we are a leading manufacturer of Steel Studs & related products for Partition Walls & MF Ceiling Systems. Our operations require limited natural resources compared with larger businesses in many other sectors, therefore we use very little amounts of water in our manufacturing process and throughout our workshop and office.

Steel Formed Sections Ltd is committed to be an industry leader in our environmental performance and is dedicated to sourcing the raw materials for our products under the guidelines of the **“BRE Environmental and Sustainability Standard - BES 6001:Issue 4.0-Framework Standard for Responsible Sourcing”** as per our **bre certificate number : RS0049 Issue:05**.

Steel Formed Sections Ltd is not a significant user of water and recognises the necessity to minimise consumption of water resources on site, particularly from municipal sources.

The company aims to act responsibly and comply with all relevant legislation in conserving water and managing water supplies to site.

Steel Formed Sections (SFS) Ltd will review the Water Policy on a regular basis to incorporate all new regulations, initiatives and technologies.

- a) SFS have noted, undetected water leaks can be a problem.
- b) SFS will check its water meter on a regular basis.
- c) If high water, use is detected then it will be investigated.
- d) If any leaks are found, they will be repaired immediately.

It is every employees' responsibility to monitor and conserve excessive water usage and to report any wastage of water or to report any possible leaks or damaged pipe work.
